OBJECTIVE

An entry-level computer science student focuses on mastering core concepts, gaining hands-on experience, building a portfolio, and networking to prepare for industry roles, while also enhancing problem-solving, communication, and time management skills.

PROJECTS

Project Register System

A web-based system using XAMPP for registering and managing academic projects.

Features:

Roles: Admin, Faculty, Student login and signup.
Project Registration: Add project details (roll number, guide name, project name, abstract link).
Search: Find projects by roll number, guide, or project name.
Admin Tools: Delete projects, add admins, update passwords.

COMMUNITY SERVICE PROJECT

Led a community service initiative aimed at raising awareness about the risks and consequences of spam calls and messages. The project involved educating community members on recognizing and reporting spam communications.

DETECTION OF BRAIN TUMOR USING ML.

DETECTION OF SKIN CANCER USING ML.
